TSB 21928: Technical Service Bulletin - Sept 28th, 2021

Regarding REP Part Number: S11246 NOx Sensor

It has come to our attention that due to a recent software update by PACCAR, our S11246 will only work on EPA 10 trucks (2010-2012)

PACCAR has superseded their OEM part# 2006246PE NOx sensor to 2236409PE. Our S11246 will NOT work on EPA 13/17 trucks.

For 2006246PE use Redline Emissions Products S11246 if EPA10 (2010-2012)

For 2236409PE if EPA 13/17 use OEM for now.

If your customer has an EPA 10 and the dealer tells them to use a 2236409PE our REP S11246 will still work. They can verify by looking at the back of the OEM unit and seeing if it shows a Continental number of 5WK96759C, which indicates it is the same as the S11246.

We are working diligently to rectify this situation and will advise once we have a solution.

Please call us at (888) 295-4670 with all questions.
